

The Colorado Community Health Network

The Colorado Community Health Network (CCHN) represents Colorado's 15 Community Health Centers that together are the backbone of the primary health care safety-net in Colorado.

Since its inception in 1982, CCHN has made significant strides in ensuring that Colorado's low-income residents have access to affordable, high-quality primary health care.

CCHN is committed to 1) educating policy makers and stakeholders about the unique needs of Community Health Centers (CHCs) and their patients, 2) providing resources to ensure that CHCs are strong organizations, and 3) supporting CHCs in maintaining the highest quality care.

Growing to meet Colorado's needs

The Five Pillars of Community Health Centers

- ✓ Serve all patients regardless of ability to pay for services,
- ✓ Are located in high-need areas,
- ✓ Provide comprehensive primary health care to patients,
- ✓ Are governed by community boards - 51% of board members must be patients, and
- ✓ Operate as nonprofits or public agencies with a mission to provide health care to low-income, working families.

COMMUNITY HEALTH CENTERS (CHCs)
are nonprofit or public health care providers with a mission to provide comprehensive primary health care to low-income working families.

Colorado CHCs provide a health care home to more than 500,000 of their community members - one in 10 people in the state.

Colorado CHCs provided more than 1.8 million medical, dental and mental health visits in 2009.*

- ✓ 15 CHCs operate 123 clinic sites in 33 Colorado counties and care for patients living in 58 counties.
- ✓ 13 CHCs operate 39 dental clinic sites in 20 Colorado counties and provided more than 190,000 visits to more than 78,000 patients.*

Colorado CHCs care for:

- ✓ 1/3 of all low-income uninsured in Colorado,
- ✓ 1/3 of all Medicaid enrollees, and
- ✓ 1/4 of all CHP+ enrollees.*

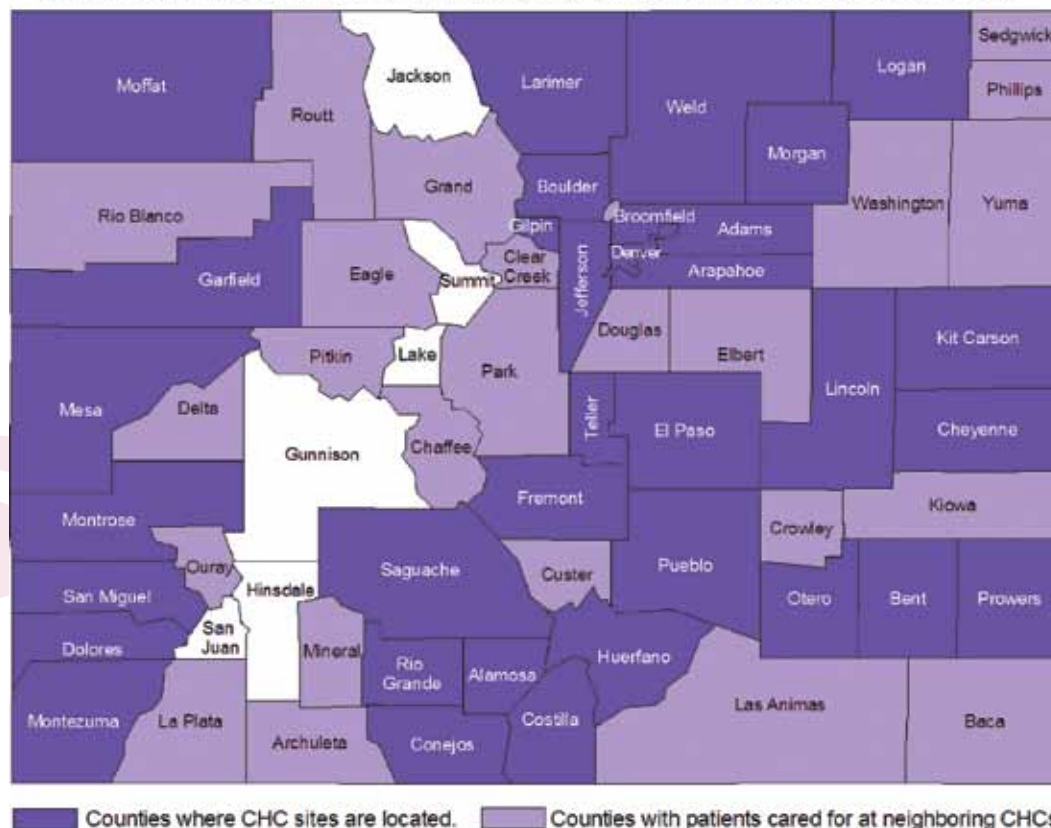

Colorado CHCs:

- ✓ Care for working families: over 90% of patients served have family incomes below 200% of the Federal Poverty Level (\$44,100 per year for a family of four in 2009).*
- ✓ Provide primary and preventive care to more than 190,000 Colorado children.*
- ✓ Provide high quality care and participate in innovative disease management programs.
- ✓ Employ more than 3,200 people in high-need communities across the state.

Communities with CHCs have healthier newborns, fewer hospitalizations, and fewer visits to the emergency room. Nationally, CHCs have been rated one of the most successful programs of the U.S. Department of Health and Human Services.
